

## SL82

thermal insulation at the highest level

- > Installation depth 82 mm
- > Glazing up to 48 mm for use with warm glazing units
- > Very good thermal insulation of 0.75 W/(m<sup>2</sup>K)
- > Ideal for energy-efficient and passive houses
- > Wide range of surface finishes – smooth, wood-like, matt and metallic

**Technical specifications****SL 82**

No of chambers	6
Installation depth	82 mm
Possible glazing width	up to 48 mm
No of gaskets	3
Hardware	Roto Komfort; Roto Multi; Roto Designo
Thermal insulation	$U_w = 0.75 \text{ W}/(\text{m}^2\text{K})$ - refers to the reference window

The **SL 82** combines excellent energy efficiency and innovative sealing technology at the highest level. It is suitable for use in passive houses. Specially optimised frames and sash constructions with thermally improved end connection and insulating triple pane reduce heat loss.
