

HST EVOLUTION DRIVE

the new dimension of comfort

- > New generation of the lift-and-slide door system
- > Possibility to make large-size structures of up to 6500 x 2700 mm
- > System of gaskets – with an additional one in the central part – for effective thermal insulation
- > Excellent thermal insulation up to $U_f = 1.3 \text{ W}/(\text{m}^2\text{K})$

Technical specifications

HST evolution drive

Installation depth	194 mm
Possible glazing width	up to 48 mm
No of gaskets	3
Hardware	Siegenia
Frame reinforcement	closed
Thermal insulation	up to $U_f 1.3 \text{ W}/(\text{m}^2\text{K})$

Large glazed areas not only provide a beautiful panoramic view, but also allow plenty of natural light to perfectly lighten up the room. The **HST evolution drive** door is designed so as to provide optimum stability, allow the use of large-size windowpanes and allows the choice of one of several comfortable operation schemes.
