

KONTUR

Simple form, excellent parameters

- › Installation depth of 82.5 mm
- › Glazing up to 48 mm, allowing for the use of energy-efficient glass units
- › Optional STV technology for bonding glass panes
- › Three perimeter seals ensuring maximum thermal and acoustic insulation
- › Six-chamber technology
- › Deeper glass positioning thanks to an elevated glazing bead with the height of 26 mm
- › Wide range of surface finishes – smooth, wood grain texture, matt and metallic

Technical characteristics	Kontur
Number of chambers	6
Installation depth	82,5 mm
Glass unit thickness	up to 48 mm
STV glass bonding	standard
Number of seals	3
Fittings	Roto Komfort; Roto Multi; Roto Designo
Thermal transmittance coefficient	0,76 W/(m²K)*

*Value provided for a reference window 1230x1480 with glazing Ug = 0.5.

KONTUR windows combine modern aesthetics with reliable functionality. Modern design characterized by simple lines is paired with exceptional burglary protection and the best thermal and acoustic insulation values is an expression of uncompromising attention to aesthetics, airtightness and security. Thanks to its outstanding static properties, The KONTUR system is perfect for creating large window elements, thanks in part to the STV® dry bonding technology.
