

SL82

thermal insulation at the highest level

- > Installation depth 82 mm
- > Glazing up to 48 mm for use with warm glazing units
- > Very good thermal insulation
- > Ideal for energy-efficient and passive houses
- > Wide range of surface finishes – smooth, wood-like, matt and metallic

Technical characteristics**SL 82**

Number of chambers	6
Installation depth	82 mm
Glass unit thickness	up to 48 mm
Number of seals	3
Fittings	Roto Komfort; Roto Multi; Roto Designo
Thermal insulation*	0.75 W/(m²K)

* Value provided for a reference window 1230x1480 mm with glazing $U_g = 0,5$

Colours

The **SL 82** combines excellent energy efficiency and innovative sealing technology at the highest level. It is suitable for use in passive houses. Specially optimised frames and sash constructions with thermally improved end connection and insulating triple pane reduce heat loss.
