

ATRIO

space without limits

- > Functional sliding solution for optimum use of space
- > Glazing up to 48 mm, allowing the use of warm glass units
- > Very good thermal insulation parameters
- > Maximum tightness thanks to the innovative sealing system
- > Wide range of colours

Technical characteristics**Atrio**

Installation depth	150 mm
Glass unit thickness	up to 48 mm
Fittings	Roto Patio Inowa
Thermal insulation*	0.79 W/(m²K)

*Value provided for a reference window 3500x2200 mm with glazing Ug = 0,5

Colour

The **Atrio** sliding system is comfortable for use, space-saving and at the same time extremely airtight. The unique properties of the Atrio system are the result of a synergistic combination of elements such as the new design of the hardware components, innovative profile geometry and the ingenious shape of the gasket.
