Glass unit thickness	up to 48 mm
Fittings	GU
Thermal insulation*	0,76 W/(m ² K)

*Value provided for a reference window 3500x2200 mm with glazing Ug = 0,5

Colour

Grando - the perfect construction that allows even very big sashes to slide with almost no effort. The unlimited glazing ensures effective lighting of the interior, both with open and closed doors. The almost invisible threshold bridges the divide between the indoor and outdoor spaces.

The figure shows one possible threshold option.
