

INTEGRO ALU

Integrated benefits of thermal insulation and statics

- › Installation depth 84 mm
- › Glazing up to 48 mm, allowing the use of warm glass units
- › Optional STV glass bonding
- › Three peripheral seals – guaranteeing maximal thermal and acoustic insulation parameters
- › The 6-chambers technology
- › Deeper glass settlement thanks to the higher glazing bead of 26 mm
- › A large selection of colours

Technical characteristics	Integro Alu
Number of chambers	6
Installation depth	84 mm
Glass unit thickness	up to 48 mm
Glass bonding	with STV technology
Number of seals	3
Fittings	Roto Komfort; Roto Multi; Roto Designo
Thermal insulation*	0,78 W/(m ² K)

* Value provided for a reference window 1230x1480 mm with glazing Ug = 0,5

Integro Alu - windows with aluminium covers combine the advantages of two materials: aluminium and plastic. The modern look of aluminium adds discreet elegance to architecture while retaining all the advantages of PVC joinery. Thanks to a wide range of colours, windows with aluminium covers offer unlimited possibilities for the creative design of one's own space, while at the same time being extremely durable and weather-resistant.
